

# Pavo MultiVit 15

The complete vitamin supplement

Do you feel that your horse needs something extra? That your horse doesn't feel great, or that its immune system needs a boost? Does your horse have problems with moulting or does its coat look dull? Then Pavo MultiVit15 offers the right support.

## The 15 essential vitamins for horses in Pavo MultiVit15

Pavo MultiVit15 contains a broad range of vitamins and Cellprotect antioxidants that support many bodily functions. Vitamin B1 (thiamine) for example plays a role in the conversion of sugars. Vitamin B2 (riboflavin), B5 and B12 ensure energy at a cellular level. Vitamin B3 (niacinamide) is required for various cell processes. Choline helps the muscles to relax. In addition to synthetic vitamin E, Pavo MultiVit15 also contains the natural CellProtect antioxidants for a better absorption of vitamin E in the blood and the neutralisation of free radicals.

The amount of vitamin A has deliberately been reduced in Pavo MultiVit15, because research has shown that this vitamin is often added in too high dosage. 'The more the better' definitely does not apply to this vitamin. An overdose of vitamin A can cause problems.

Pavo MultiVit15 is a complete vitamin supplement that boosts the horse's immune system. The product contributes to a shiny coat and easy shedding. Pavo MultiVit15 does not contain wheat.

Available in a 3 kg bucket with sealable lid.

### Important characteristics

- Complete vitamin supplement
- Contains the 15 essential vitamins for horses
- Supports the immune system
- For shiny coats and easy moulting

### Application

- For horses and ponies that need just that bit of extra vitamins
- For horses that suffer from season change
- For older horses

### Feeding advice

A treatment of three to four weeks, adding daily Pavo MultiVit 15 to the feed, is usually sufficient, however, a long-term course of treatment will not do any harm.

- Horse (approx. 600 kg): 100 grams per day
- Pony (approx. 300 kg): 50 grams per day
