

Pavo OmegaFit

Unique Omega 3-6-9 oil to support general health

Do you want the best for your horse? By providing support for optimum health, but in a natural way? Pavo OmegaFit is a plant-based Omega 3-6-9 oil with the highest level of accessible Omega fatty acids in its class making it the best possible promoter of your horse's health.

Omega 3-6-9 oil for horses

Horses cannot create essential Omega fatty acids for themselves, though these are much needed for the proper functioning of their bodies. With Pavo OmegaFit you are providing a complete Omega 3-6-9 oil with an unparalleled high level of the most important Omega-3 fatty acids. These are critical for all sorts of processes within the body and support, amongst other things, immunity, breathing, muscle recovery, joints and mobility, skin and coat, and the cardiovascular system. Not only does Pavo OmegaFit contain anti-inflammatory Omega 3-fatty acids, but also the unique anti-inflammatory Omega 6-fatty acid GLA (gamma linolenic acid).

Aside from the quantity, the ratio of Omega 3 and 6 is of major importance: the incorrect ratio can have adverse effects and can actually promote inflammation. The optimum ratio, in combination with the maximum accessible content, are what make Pavo OmegaFit so special.

An Omega deficiency is recognisable by a dull coat, low energy, low immunocompetence, or general malaise.

The natural power of Ahiflower oil

The most important ingredient of Pavo OmegaFit is Ahiflower: a plant-based oil that is completely new in equine nutrition. The major difference from comparable oils is that Ahiflower naturally has by far the greatest proportion of Omega 3. This is because the fatty acids in Ahiflower can be absorbed directly and without a primary conversion step. This means that nothing is lost and so there is much more Omega 3 left for your horse. Generally, such high contents can only be obtained from unpalatable animal sources. Pavo OmegaFit, on the other hand, is 100% plant-based and not only are all horses guaranteed to find it tasty to eat, it is also a perfect match for the natural feeding of your horse.

Important characteristics

- Unique Omega 3-6-9 oil
- Made from Ahiflower[®] oil
- Unparalleled high content of Omega fatty acids
- Correct ratio of proportions
- Twice as effective as comparable oils
- Scientifically proven effect
- 100% plant
- Guaranteed absorption

Application

Ideal for all horses and ponies to support:

- General health
- Skin and coat
- Mobility and joints
- Breathing
- Immune system
- Muscle recovery
- Reproduction

Feeding advice

Daily recommendation:

Body weight	Amount per day
200 kg	10 ml
300 kg	15 ml
400 kg	20 ml
500 kg	25 ml
600 kg	30 ml
700 kg	35 ml

Tip: use the handy dosing aid on the bottle to measure out the correct amount.
