

Pavo Podo®Junior

For foals and young horses

Together with movement and genetics, feeding is one of the essential factors that influence the joint problems which we all want to prevent: OC and OCD. A steady and even growth combined with a well-balanced mineral supply is of key importance. With the Pavo Podo®Junior muesli, you optimally support the developing of healthy bones which is crucial for a horse's health and future performance.

Steady growth

Especially in the first year foals are growing tremendously. Growth is positive, as long as it comes at a steady and good pace. When a young horse grows too quickly and growth is irregular, there is an increased risk of disruption in the bone development process. Naturally this increases the chance of developing joint problems.

Energy and protein are essential for healthy growth. Pavo Podo®Junior provides the horse with energy out of a mixture of fats, fibres and also puffed grains. The energy that comes from these resources is released slowly, meaning a low constant amount of energy becomes available. Furthermore, Pavo Podo®Junior provides the horse with sufficient proteins which also enables healthy muscle development.

Podo®: the proven concept for healthy bones

Pavo has always done a lot of research into the ideal feed for the breeding world and from here the Pavo Podo concept was developed. The Podo concept is a unique complex of mineral and trace elements, that is scientifically proven to decrease the probability of developing OC(D) in young horses by 50%. Pavo Podo®Junior is equipped with this unique and proven Podo® concept and therefore supports healthy bone development optimally.

Additional support

To further support digestion, Pavo Podo®Junior is high in fibre. As a result, the feeding intake is slowed down and chewing is stimulated, resulting in the production of saliva. The production of saliva is important as it helps to decrease stomach acidity. However, not all fibres are suitable for young horses! Therefore, all fibres in Pavo Podo®Junior are carefully chosen to still reap the benefits of fibres without irritating the sensitive stomach wall.

Pavo Podo®Junior

For foals and young horses

Product Specifications

Contains

Timothy
Rice bran
Wheat feed
Apple pulp
Soyabeanmeal
Puffed Barley
Lucerne (alfalfa)
Soyabean flakes
Sunflower seed meal
Cane Molasses
Puffed Maize
Wheat straw
Linseedoil
Sodium chloride
Calcium carbonate
Peas Flakes
Monocalcium phosphate
Carrot flakes
Magnesium Oxide
Soyabeanoil
Macleaya extract
Brewer's yeast
CellProtect

Guaranteed analysis

| | |
|---------------|--------|
| Crude protein | 15,5 % |
| Crude fat | 8,0 % |
| Crude fibre | 13,0 % |
| Crude ash | 11,5 % |
| Sugar | 6,5 % |
| Starch | 14,5 % |
| Calcium | 1,50 % |
| Phosphorus | 0,80 % |
| Sodium | 0,50 % |
| Potassium | 1,35 % |
| Magnesium | 0,60 % |
| Lysine | 6,8 g |
| Methionine | 2,2 g |

Vitamin levels (per kg)

| | |
|------------------|-----------|
| Vitamin A | 18.000 IE |
| Vitamin D3 | 3.000 IE |
| Vitamin E | 426 mg |
| Vitamin K3 | 4 mg |
| Vitamin B1 | 45 mg |
| Vitamin B2 | 18 mg |
| Niacinamide | 36 mg |
| Pantothenic acid | 26 mg |
| Vitamin B6 | 12 mg |
| D-Biotin | 630 mcg |
| Folic acid | 10 mg |
| Copper | 78 mg |
| Iron | 144 mg |
| Zinc | 312 mg |
| Manganese | 198 mg |
| Selenium | 0,96 mg |
| Iodine | 1,20 mg |

Storage advise

Store in a cool, dry and dark place.
Reclose after usage

Feeding advice kg/day

| 1 | 0,45 kg / day | 0,90 kg / day |
|---------|--|---------------|
| 2 | 0,60 kg / day | 1,20 kg / day |
| 3 | 0,75 kg / day | 1,50 kg / day |
| 4 | 0,90 kg / day | 1,80 kg / day |
| 5 | 1,05 kg / day | 2,10kg / day |
| 6 | 1,20 kg / day | 2,40 kg / day |
| 7 | 1,00 kg / day | 2,10 kg / day |
| 18 – 30 | 0,75 kg / day | 1,50 kg / day |
| >30 | Slowly change to feed for adult horses after 30-36 months. | |
