

# Pavo Nature's Best

The daily healthy muesli

Too much sugar and starch is not healthy for horses which are not exercised intensively or which are sensitive to laminitis, for example. Pavo Nature's Best contains a very low sugar and starch content, less cereals and extra timothy grass.

Timothy grass is a tasty grass species which has a low fructans content and provides protein and healthy fibres. In addition, this muesli contains spelt, alfalfa, soy flakes, and extruded linseed for a shiny coat. Furthermore, the vitamins, minerals and trace elements have been adjusted according to the latest insights and based on the average nutritional values in the present roughage.

Available in 3kg, 15kg bags and also available in Big Box: the ideal bulk package when you feed 5 to 10 horses the same type of concentrated feed. The Pavo Big Box is more advantageous than bagged feed.
