

Pavo Condition

Daily high fibre pellet

Pavo Condition has been renewed! At Pavo, we are committed to continuous innovation by launching new products on the market as well as continuously developing our current products. As a result of a survey carried out amongst users of Pavo Condition, our most popular pellet has been renewed according to the latest insights and wishes of our clients. We have added more structure and fibres and decreased the sugar and starch content. In addition, the new Pavo Condition contains all the vitamins horses need and the formula is oat-free.

Curious about the exact changes? Then view the old and new composition of Pavo Condition next to each other.

High-fibre maintenance pellet for all horses

Pavo Condition is the ideal high-fibre maintenance pellet for horses and ponies in light work. Pavo Condition is fully balanced with vitamins and minerals and by giving Pavo Condition you ensure that your horse receives all the nutrients it needs for light work or when you have just started training. Naturally, carefully composed according to the most recent scientific findings. Pavo Condition meets all the daily requirements regarding vitamins and minerals, has a high content of easily digestible fibres and a decreased sugar and starch content, which results in an excellent, non-excitabile feed for leisure horses and ponies or those that compete at a lower level. Pavo Condition is free of oats, which also makes it suitable for horses that easily become hot from oats.

Also available in BigBox

Pavo Condition is also available in BigBox: the perfect wholesale pack when 5 to 10 horses get the same type of concentrates. The Pavo BigBox is much cheaper than bagged pellets and is delivered to your home or stable.

Important characteristics

- Fully meets the daily requirement of vitamins and minerals
- Extra linseed for a shiny coat
- Decreased sugar and starch content
- Oat-free formula
- Excellent price/quality ratio

Application

- For all horses and ponies in light work, such as novice classes
- Horses that need little energy supply
- For horses that easily become hot from oats

Feeding advice

The required amount of Pavo Condition depends among other things on whether the horse has access to pasture and the amount of work.

Average advice maintenance:

- 330 grams per 100 kg body weight per day

Average advice in case of light work:

- 420 grams per 100 kg body weight per day

Scoop content:

- 1 full Pavo feed scoop Condition contains approximately 1,160 kg (weighted dry)
