

Pavo Liga

The concentrate for Icelandic horses and other good doers

Breeds of horses and ponies that are good doers or maintain their weight well do not require high-energy concentrate feeds. Pavo Liga has been specially developed for good doers to provide all the essential vitamins such as vitamin E, biotin for strong hooves, and the minerals copper, zinc and selenium. Minerals are provided in a chelated form to ensure optimal absorption of these vital nutrients. Pavo Liga contains all the nutrients that good doers require for optimal health, a shiny coat and strong hooves.

Important characteristics

- Double amount vitamins and minerals per kilo concentrated
- Low in energy
- Extra copper, zinc, selenium and biotin
- Organically bounded trace-elements

Application

Suitable for:

- All good doers requiring a low energy intake
- Provides all the necessary vitamins and minerals in a minimal amount of feed

Feeding advice

- Average advice for maintenance: 250 gram per 100 kg bodyweight per day.
- Maximum advice in light work: 320 gram per 100kg bodyweight per day
