**EQUINE VETERINARIAN  
TEUN STERK - PROTEINS ARE  
NECESSARY FOR MUSCLES**

"The right feed can make a huge difference in top sport." This is the opinion of equine veterinarian Drs. Teun Sterk from Bodegraven veterinarian clinic. Specialized supervision of top-sport horses is a large part of the job for him and his colleagues. They do not only treat horses, but carry out a lot of preventative management.

Not every sport horse is examined because it has a problem. For horses that compete at the highest level, supervision starts with drafting a 'performance profile' in order to monitor the horse's health. By doing so, minor problems are detected in time, before they develop into serious injuries.

Supervision of  
sport horses

management

Feed

Training

If the horse's performance is disappointing, we also examine its diet. Proteins is an important ingredient. According to Sterk, it is hard to see from the outside whether the horse gets sufficient proteins or not. "Sometimes you will see that the muscles of the top line are not well developed. When a horse does not move supple or has sufficient energy during training, this must set off an alarm bell for both rider and trainer." In collaboration with Bodegraven Veterinarian Clinic Pavo has developed its product Pavo TopSport which can be given in addition to the concentrate feed to restore the protein balance. Sterk: "We are incredibly enthusiastic. It gives you the opportunity to easily adjust and the results are quickly apparent."

**NEW: EXCLUSIVELY FOR AMBITIOUS RIDERS!**

**PAVO TOPSPORT**

**EXCELLENT MUESLI TOPPING FOR (TOP)SPORT HORSES**

- 20 % protein & 18 % oil
- Feeding advice: replace 1 kg of your normal concentrate for 1 kg Pavo TopSport
- For horses that are trained every day on a high level
- In addition to poor roughage (low energy / low protein) or in diets without fresh grass

CONTAINS PER KG	
MJ	14,2
Dig. crude protein	16,8 %
Crude protein	20,0 %
Crude fat	18,0 %
Crude fibre	7,2 %
Crude ash	8,9 %
Sugar	5,0 %
Starch	16,5 %
Calcium	0,9 %
Phosphorus	0,5 %
Sodium	0,7 %
Magnesium	0,7 %
Lysine	9,8 g
Methionine	3,1 g
Threonine	7,5 g
Vitamin A	15.000 IE
Vitamin D3	2.500 IE
Vitamin E	750 mg
Vitamin C	500 mg
D-Biotin	300 mcg

PAVO HORSE FEEDS EXCLUSIVELY FOR  
**AMBITIOUS  
RIDERS**

**No compromise:**  
Healthy horse feeds from Pavo

**Introducing our complete sport range**

# PAVO SPORT FEEDS

## PAVO ALLSPORTS

SPORTFEED FOR EVERY DISCIPLIN

- High energy pellet with omega 3 & 6 fatty acids
- Extra magnesium for muscles and joints
- Added linseed for a shiny coat
- Highly digestible starch to optimise digestion

## PAVO SPORTSFIT

SPORTMUESLI FOR EVERY DISCIPLIN

- Extra magnesium, specially suited for competition horses
- Contains powerful anti-oxidants, natural vitamin E and selenium for optimal muscle condition
- Oil as a clean source of energy for increased stamina and a shiny coat
- Mixture of energy sources to avoid making horses too 'excitable'

## PAVO ENERGYCONTROL

TOP SPORTS FEED FOR SUSTAINED PERFORMANCE

- With slow-release energy for improved stamina
- Extra vitamin E for supple muscles
- With powerful anti-oxidants for the care of muscles
- Slows down the formation of lactic acid in the muscles during sport and training

## PAVO TRIPLE P

POWER PERFORMANCE MUESLI

- Quick release energy
- Mixture of vitamins, minerals and trace elements for competition horses
- Made from puffed cereals, therefore easily digestible
- Also easily absorbed in stressful situations

## PAVO GOLD E

BRINGS BALANCE TO A CEREAL DIET

- Extra vitamins, calcium and magnesium
- Highly concentrated - only a small amount required each day
- Extremely high energy value
- Restores the balance of nutrients and minerals lacking in cereals

# PAVO SUPPLEMENTS

**NEW IN HORSE FEEDS: WITH MET BETA-ALANIN, DOPINGFREE!**

## PAVO NERVCONTROL

RELAXING THE HORSE

- Helps to reduce tension in sensitive horses
- Better control in stressful situations
- Contains magnesium and L-tryptophan for better signaling in the nervous system

## PAVO EPLUS

FOR BETTER STAYING POWER

- Keeps muscles supple
- Give before and during strenuous physical training or competition
- Especially for disciplines that require stamina such as endurance, eventing and dressage

## PAVO MUSCLEBUILD

FOR RAPID MUSCLE DEVELOPMENT

- Supports muscle development
- Contains essential amino acids
- With Vitamin C and lecithin
- For more muscle mass and stronger muscles

## PAVO MUSCLECARE

CARING FOR STIFF AND TENSE MUSCLES

- For stiff and tense muscles
- Fast recovery after strenuous training
- For horses that are prone to tying-up

### Beta-alanine:

Beta-alanine is a non-essential amino acid that is a part of carnosine. Carnosine determines the buffer capacity for lactic acid in the muscles. By adding beta-alanine to the ration, the body can produce more carnosine and slow down the process of acidification of the muscles. So it is easier for the horse to work longer and more intensive.
